DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 18-22, drawn to a coil assembly, classified in class 324, subclass 318.
 - II. Claims 8-17 and 23-25, drawn to a method for operating a coil assembly, classified in class 324, subclass 322.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the coil assembly can be used in a materially different method, such as an imaging method where nerve stimulation is not a concern. Also the method that includes the steps of establishing an allowable gradient field strength, applying a weighting factor and establishing a slew rate etc. can be practiced with a conventional gradient assembly as opposed to the inventive gradient assembly claimed in group I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2859

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
